April – June, 2026
RECRUITMENT STATEMENT

From Program Director, Pete Povich:

Jacob Shiring, a student from Penn West California University, is currently interning with the station. He is interested in production work and overall sound equipment. Shiring has spent time with Mark Uriah in the production studio and has spent time with George Lasko our engineer associate. Danny Flynn, from Waynesburg University, is finishing his internship in the news room and on air.

April – June, 2026
“INFOTRAK” Public Service Program, Sundays, 8AM

Date:	Issues:	Duration:	Guests & Narratives:
4/5/26	Domestic Abuse Women’s Issues	9:05 minutes	Ms. Divine said that domestic and sexual abuse is a huge problem but often the victims get little help. She explained why it is so important to shed light on the issue and educate the public about the warning signs. She also explained why leaving an abusive situation is the most dangerous time for the victim, and how victims can find help.
4/5/26	Retirement Planning Personal Finance Government Programs	8:12 minutes	Mr. Fellowes co-authored a report that found that only 4% of retirees sign up for Social Security at the most profitable time. He said this single mistake costs the typical American household an average of \$111,000 in lost retirement income. He said that most people should claim Social Security later than they typically do, but he recommends seeking professional advice.
4/5/26	Traffic Safety Women’s Issues Senior Citizens	5:03 minutes	Dr. Forman led a study that concluded that women are 73 percent more likely to be injured in a car accident than men. Older people were also at greater risk of injury. He talked about the likely reasons behind this trend. He also said that all car occupants are now more than half as likely to sustain serious injuries in cars less than ten years old than in older cars.
4/12/26	Youth At Risk Volunteerism	8:31 minutes	What does it actually take to give every young American a real shot at a better life than their parents had? Mr. Clark discussed his organization's mission to help young people reach their full potential through after-school and summer programs. He noted that for every \$1 invested in Boys and Girls Clubs, communities receive a \$10.32 economic return, demonstrating both meaningful life outcomes and significant financial impact. He also explained how youth and volunteer adults can get involved.
4/12/26	Women’s Concerns Career	8:38 minutes	Ms. O'Connell's discussed a gender double standard where women face penalties for displaying workplace ambition that men are rewarded for. She said when women negotiate salaries, assert themselves, or seek leadership roles, they are less likely to succeed and more often labeled difficult or not team players. This creates a likeability paradox where assertiveness, coded as masculine, makes women seem less warm and compassionate, resulting in fewer promotions and mentoring opportunities. She offered advice for women seeking to get around barriers to career advancement.

4/12/26	Senior Citizens Mental Health Nutrition	5:12 minutes	Imagine your doctor writing you a prescription not for pills, but for a meal at your local senior center. Prof. Trull discussed the importance of community connection, particularly for rural senior citizens. She explained an initiative she developed, aimed at connecting older adults to senior meal sites. Beyond nutrition, she said the program addresses the critical issue of senior isolation and mental health.
4/19/26	Artificial Intelligence Parenting	8:07 minutes	Mr. Robb shared research that revealed striking differences in how teenagers and their parents view artificial intelligence. He said parents particularly fear AI's impact on creativity, critical thinking, and future job prospects for their children, but young people view it through a more optimistic lens. He emphasized the importance of parental oversight and suggested families start discussions about data privacy.
4/19/26	Autism Organ Donation	9:16 minutes	Americans strongly support autism research, but 70% are unaware that brain donation is needed to advance it. Prof. Amaral explained that many people confuse organ donation with brain donation and don't realize that studying donated brains is crucial for understanding autism's neurological basis. He explained how families can arrange for a brain donation after a loved one passes away.
4/19/26	Nutrition Parenting	5:08 minutes	Prof. Miliku said her research has found that ultra-processed foods in preschool years are associated with behavioral difficulties in childhood. She found that ultra-processed foods, particularly sugar-sweetened beverages, are associated with behavioral difficulties like anxiety and aggression in preschoolers. Rather than eliminating foods entirely, she advises parents to gradually shift their children's diet toward minimally processed options.
4/26/26	Personal Finance Government Programs Parenting	8:54 minutes	Imagine the government handing your newborn \$1,000 that quietly grows for nearly two decades or more. Mr. Delorme explained what parents need to know about Trump accounts, which are new savings vehicles for children starting at birth. He said most new parents have no idea they need to opt in to receive it. Accounts open July 4th, 2026, and he advised parents to visit TrumpAccounts.gov to submit information and elect contributions for eligible children.

4/26/26	ADHD treatment Medical Research	8:27 minutes	Traditional treatment of ADHD uses stimulants, such as amphetamines. Dr. Gershon discussed his groundbreaking research on attention, revealing that it's not about increased brain activity but rather the brain's ability to filter distractions from important information. He said his team discovered that a specific gene is crucial in shaping attention. Mice with lower levels of two specific versions of the gene enjoyed quieter brain activity and improved ability to focus. He believes his research could lead to new ADHD treatments to create a "quieter brain" with less baseline activity but stronger responses when needed.
4/26/26	Mentoring Volunteerism Youth At Risk	5:08 minutes	Mr. Myrie explained that his nonprofit works to expand access to mentoring relationships for young people across America. Mentor supports schools, workforce development, and peer-to-peer connections, particularly in underserved urban and rural communities. He discussed the reasons that mentoring benefits both youth mentees and adult mentors, and he explained how youth and adults can get involved in the organization.
5/3/26	Youth at Risk Homelessness Parenting	9:40 minutes	Ms. Frankel discussed the increasing problem of runaway and homeless teenagers. She said 1 out of 30 youth ages 13-17 experience homelessness at some point each year, 4.2 million in all. She explained the reasons that young people leave and how they survive on the streets. She outlined the services that her organization offers to help.
5/3/26	Disabilities Discrimination	7:37 minutes	Prof. Chopik led a study that examined biases toward people with disabilities. He said bias toward people with disabilities is quite common, but few will acknowledge it. He talked about the demographic groups who are most likely to be prejudiced towards the disabled, and how the problem can be addressed.
5/3/26	Renewable Energy Poverty Government Policies	4:53 minutes	Efforts to replace fossil fuels with renewable energy sources can help lower carbon emissions. However, Prof. McGee led a recent study that found that renewable energy increases "energy inequality" for lower-income Americans because it costs more than energy produced by oil, coal and natural gas.
5/10/26	Personal Health Aging Artificial Intelligence	9:02 minutes	Dr. St. Sauver shared results of her study that suggests that artificial intelligence can quickly analyze abdominal CT scans and identify adults at higher risk of falling as early as middle age. She said the findings emphasize the importance of maintaining good core strength throughout adulthood to potentially reduce future fall risk. She also discussed AI's growing role in accelerating medical research.

5/10/26	Energy Conservation Housing Local Regulation	8:21 minutes	When nine out of ten renters pay their own utility bills but don't own the buildings they live in, who's going to pay for better insulation? Prof. Homsy discussed potential approaches aimed at encouraging landlords to implement energy-efficient improvements, such as rental registry programs with efficiency standards and taxpayer-provided landlord grants.
5/10/26	Child Learning Development	5:02 minutes	Is there a developmental difference between teaching children to read using e-books versus traditional books?
5/17/26	Economics Tax Policy Digital Currency Consumer Finance	10:02 minutes	Prof. Delapierre discussed proposals to reduce or eliminate large-denomination cash currency in order to decrease tax evasion and illegal financial activity. He explained that some economists believe reducing the use of cash could increase government tax revenues and potentially allow lower income taxes. He also discussed concerns about privacy, the growth of electronic payments, and the possible future use of government-backed digital currency systems.
5/17/26	Drug Abuse Public Health College Students Marijuana	9:28 minutes	Dr. Volkow discussed new research showing that marijuana use among college-age adults has reached the highest levels ever recorded, while alcohol consumption among young adults has declined. She explained how legalization, social attitudes and pandemic-related stress may be influencing marijuana use trends. She also discussed increased use of hallucinogenic drugs and concerns about commercial marijuana industries promoting addiction.
5/17/26	Technology Internet Infrastructure Space Weather Emergency Preparedness	7:18 minutes	Prof. Abdu Jyothi discussed research warning that a severe solar storm could disrupt internet infrastructure and power systems worldwide. She explained how massive coronal mass ejections from the sun could damage long-distance electrical conductors and communication cables, potentially causing widespread internet outages lasting days or longer. She also discussed the need for governments and technology companies to better prepare critical infrastructure for such events.
5/24/26	Literacy Education	8:48 minutes	Ms. Chapman offered advice for parents who want to encourage a love of reading in their children. She explained why youngsters who read for fun do better in school than those who do not. She also talked about the importance of allowing kids to choose their own reading material.
5/24/26	Retirement Planning Senior Citizens	8:19 minutes	Mr. Reeves outlined the most common mistakes investors make when handling their 401(k) investments. He explained how frequently an investor should do some housekeeping with their mutual fund portfolio and how to decide when to rebalance investments that have changed in value.

5/24/26	Women's Issues Senior Citizens	5:03 minutes	Age 40 is a harrowing milestone for many women. Ms. Brokaw talked about the reasons behind this, and how women can navigate the transition into midlife with more enjoyment. She said society sends women many conflicting messages about being their own person and yet conforming to traditional expectations
5/31/26	Sexual Assault Crime Women's Issues	8:18 minutes	FBI statistics say that 1 in 4 females in the US will be a victim of violent crime. Ms. Steinberg talked about the most common types of violence directed at young women, and offered suggestions of how to avoid dangerous situations. She explained why it is so important for prospective college students to evaluate campus security before they make a decision on where to go to school.
5/31/26	Counterfeiting Crime Government Regulations	8:55 minutes	Mr. Wasilenkoff discussed the measures that governments take to prevent counterfeiting of currencies. He said that a large percentage of counterfeit US bills are believed to be produced by state-sponsored operations in countries such as North Korea. He explained why recent measures, such as the improved \$100 bill, do slow down counterfeiters temporarily. However, he said criminals eventually adapt to such changes, so it is a never-ending battle. He explained how consumers can try to identify counterfeit bills.
5/31/26	Substance abuse Government Regulations	5:04 minutes	Dr. Moreno recently conducted a study that found that teens who smoke cigarettes are 23 times more likely to smoke marijuana, compared to those who don't use tobacco. She talked about the reasons behind this finding. She also explained how the recent legalization of marijuana in several states may affect its use nationwide..
6/7/26	Personal Health Consumer Matters	8:01 minutes	Every year, the average American eats thirty-three pounds of cheese, seventy pounds of sugar and double the recommended amount of salt--most of it from processed foods. Mr. Moss said that the use of salt, sugar and fat increases sales of processed foods, reduces manufacturing costs, and enables these foods to sit in warehouses or on the grocery shelf for months. He offered suggestions for consumers on how to read product labels.
6/7/26	Employment Workplace Matters	8:59 minutes	Ms. Donston-Miller said social media has essentially become an online resume, and that job hunters who do not use it are at a huge disadvantage. She discussed the most effective strategies for using social media in job searches and networking with colleagues. She explained which social networks are the most useful and why. She also recommended sharing content on social networks, such as reports or videos, to demonstrate expertise and abilities.

6/7/26	Payday Loans Poverty Government Regulations	5:10 minutes	Mr. Lohrentz recently conducted a study of payday loans and their net impact on the US economy. He found that the burden of repaying the high-interest loans results in \$774 million in lost consumer spending and 14,000 job losses annually. He outlined the alternatives to payday loans that are available to low-income borrowers.
6/14/26	Retirement Career	8:42 minutes	Ms. Collinson talked about the option of “phased retirement,” in which an employee begins to gradually put in shorter work weeks. She said the strategy permits workers to test out retirement to see if they enjoy it and can afford it, and allows them to avoid tapping into Social Security or savings until truly necessary. She said many employers welcome it, because it allows the senior employee to mentor younger colleagues and the organization to retain institutional knowledge.
6/14/26	Health and Nutrition Consumer Matters	8:34 minutes	Dr. Wansink discussed his research at Cornell, which examines how and why we make choices about the food we eat. He said the way a kitchen or other living environment is set up can encourage weight loss naturally. He outlined innovative but inexpensive steps restaurants, grocery stores and school cafeterias can make to encourage healthier dining choices.
6/14/26	Charitable Contributions Volunteerism Mental Health	4:24 minutes	At age thirty-five, Ms. Walker was diagnosed with multiple sclerosis. As she battled depression about her illness, she received an uncommon prescription from an African medicine woman: Give to others for 29 days. She shared her story of finding small ways to help others, and how it made a dramatic difference in her own health and happiness.
6/21/26	Consumer Matters Mental Health	8:07 minutes	Dr. Dunn’s research found that people can significantly improve their happiness if they change the way they spend money. She said material things like luxurious homes or new gadgets provide much less happiness than experiential purchases like trips or concerts. She said spending money on other people provides a bigger happiness boost than almost any other expenditure.
6/21/26	Suicide Mental Health Substance Abuse	9:07 minutes	Suicides among middle-aged Americans have increased dramatically in the past decade. Dr. Caine said the rate among white men and women in that age group jumped 40 percent, while it was essentially unchanged for most other racial groups. He said the recession and mortgage crisis may be an important factor in the increase. He added that Baby Boomers seem to have higher levels of depression than other demographic groups. He talked about potential warning signs for those at risk of suicide.

6/21/26	Drunk Driving	4:56 minutes	Dr. Barry conducted a study that found that two in five designated drivers had been drinking before getting behind the wheel and that 18% had blood-alcohol levels high enough to impair their driving skills. He outlined the potential reasons that designated driver education campaigns have been less than successful.
6/28/26	Sexual Abuse Youth At Risk Parenting	8:12 minutes	Many parents will soon send their children off to summer camp, scouting events and sports activities. But without proper safeguards in place, these environments can provide opportunities for sexual misconduct and abuse to occur. Mr. Bates outlined the abuse prevention policies that youth-serving organizations need to implement, and the questions parents must ask to ensure that they are.
6/28/26	Personal Finance Consumer Matters	9:02 minutes	Mr. Sullivan explained why some people, even “rich” people, never find true wealth, and why other people, even those who have far less are much wealthier. He offered tips on how middle-class consumers can make better financial decisions and come to terms with what money truly means. He said changing how Americans think about wealth can lead to more secure and less stressful lives.
6/28/26	Education Personal Finance	5:03 minutes	Ms. Cary said parents of high school students can save thousands of dollars in college costs if their child takes Advanced Placement courses in high school. She explained who is eligible for the classes and how prospective students can determine if a college accepts the credits. She also outlined other benefits for students who have completed AP courses.
